

GG7 High Grip Moulded Steel-Cored Handles

Features

- Semi-rigid surface, no hard edges
- Textured finish
- With 'snap-in' plugs to conceal mounting details
- For applications where exceptionally high grip is desirable
- Designed for applications which require great strength, good aesthetics and user-friendliness

Material

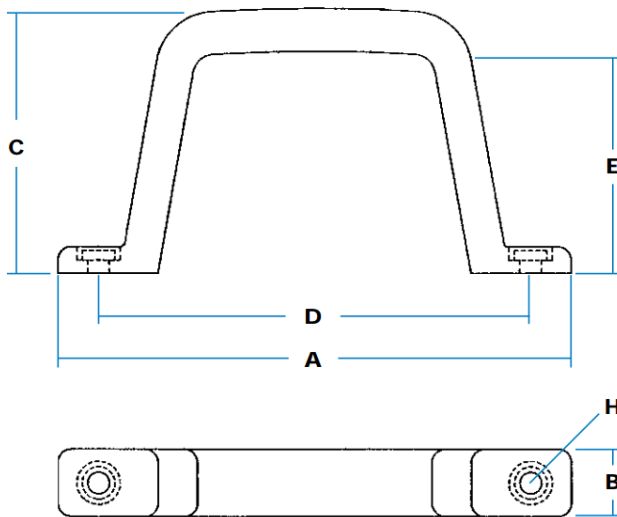

- Moulded in thermoplastic elastomer around steel core, with black textured finish

Product Performance

- Load capacity:
 - Parallel to fixing - 500 kg before significant distortion
 - Recommended safe working load - max. 250 kg

Notes

- Installation by bolting through 8 mm holes in steel core and cover with plugs provided

After fixing it is recommended that cover plugs are permanently retained with a suitable adhesive

Replacement plugs available G00538B
