

GB10 'Plant-On' T & L-Handle

Features

- An older, special design but still popular because of the unusual shape of the handle castings, particularly the deep side-walls and the narrowness of the escutcheon
- All fittings are contained above panel surface, making handles fully 'plant-on'
- Locking and non-locking models available
- Rotation is limited to 90° (clockwise) and 90° RH (anti-clockwise) as shown, locking in both positions
- Concealed fixing only, by two screws into tapped bosses at 35 mm hole centres
- Available in bright chromium-plated or black powder-coated

Material

- Steel, chromium plated (or black powder coated on request)

Notes

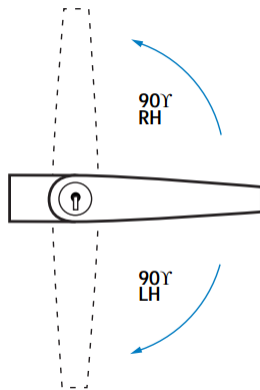

- 'FS' keys as standard with 'shuttered' keyway. Optionally 'FT' or 'DLP' key types also available
- Gasket provided
- **Contact Gripwell sales for cam pawl and centre-case options**
