

GF11 Die Cast Lift-Off Hinge (For Flush Doors)

Features

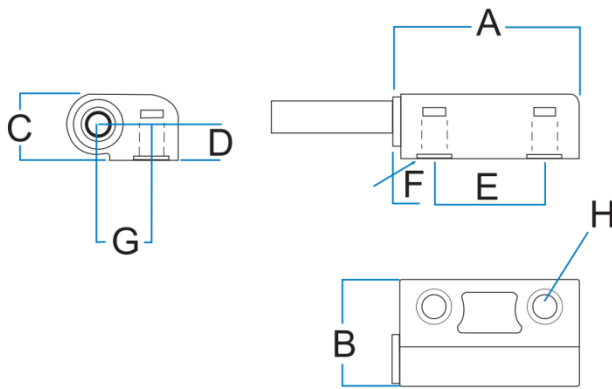

- Simple way to hang flush doors on metal cabinets, electrical enclosures, etc. allowing "lift-off" capability from a narrow door surrounding
- 'Handed', left- and right -, these hinges provide great flexibility in a variety of configurations. See schemes below. Use one hinge of each hand to create a non-lift-off, permanently retained door.
- Bottom half of hinge contains a fixed, stainless steel pin, and is fitted to door frame. Top half is fitted to face of door and is lifted on (and off) pin. Movement is completely free.
- Plant-on fitting, with two holes in base of each portion, tapped for M6 bolts

Material

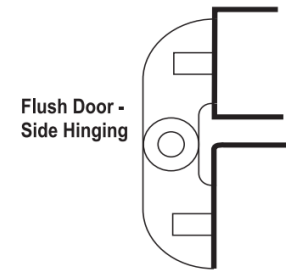

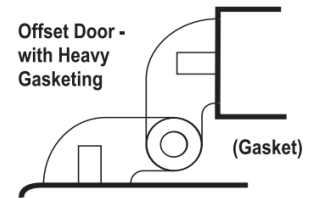

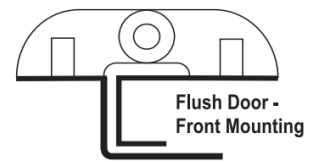

- Body: Zinc die cast, chromium plated / black powder coated / raw finish
- Pin: Stainless steel
