

## GC16 Deep Dish Padlockable Paddle Hook Latch

### Features

- This new, padlockable version of our 'deep-dish' paddle latch is ideal for applications where it is necessary to visually check that compartments have been secured, or with rental equipment when the operator prefers to fit their own standard padlock.
- The deep, wide case gives easy access for a gloved hand and the 'reverse flap' design means the latch gives good leverage and can be readily opened when mounted at either top or bottom of a door.
- Double-section welded steel loop in base of paddle dish allows padlock to be easily secured and prevents flap from being opened.
- Model illustrated (right) has open-fixing holes, but concealed fixing provides neater appearance and greater security.

**GC16-G02041B**  
(Black powder-coated finish with 'hook-latch' action and open-fixing)

### Material

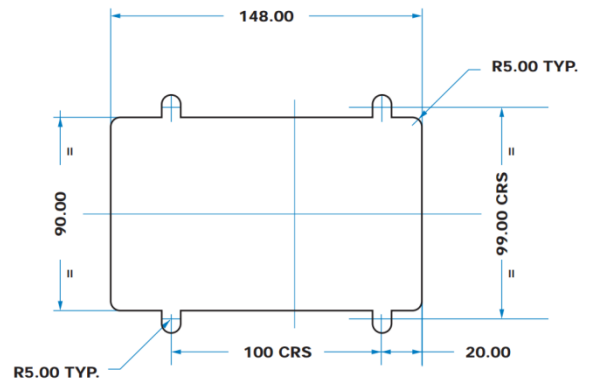

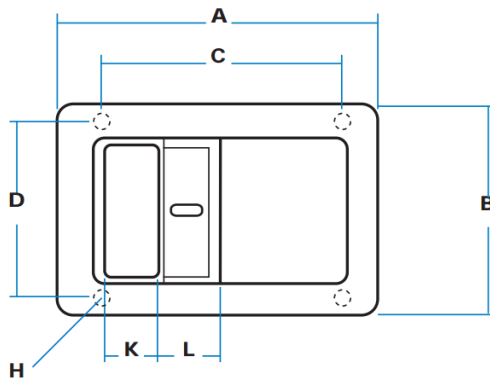

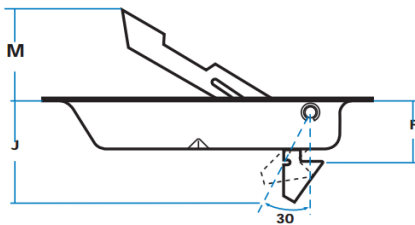

- Normally mild steel, zinc-plated or black powder-coated

### Notes

- Special options include:
  - Polished stainless steel
  - Slam-bolt or hook-latch operation
  - Pierced rim or plain rim, or welded studs for concealed fixing
- Striker **G00406** sold separately

*Double-thickness padlock loop with 10mm diameter aperture*
