

GC3 Weatherproof Paddle Hook Latch

Features

- These new paddles are weatherproof, lightweight, and acoustically 'quiet'
- Flush-fitting, and with no visible mounting points, they can be quickly installed in the same aperture as our standard rectangular 'paddles' using 'U' bracket and bolts provided
- Stainless steel loop striker ensures positive engagement to resist vibration
- Moulded case with integral gasket and no rear apertures prevents entry of water
- Moulded 'ramp' on hook provides exceptionally smooth action
- As door closes, the ramped face of hook meets the striker and is forced to engage. Once shut, spring action secures hook under striker loop
- Locking with key blocks movement of flap but hook is still free to operate and will slam shut

Material

- Case and flap: Glass-filled nylon, black lightly textured finish
- Steel components are zinc plated for corrosion resistance

Notes

- Fixed with two M8 stainless bolts and steel 'U'-bracket which clamps paddle against underside of panel
- Special models include an extended 'hook' (dimension 'F' = 50 mm) which offers greater depth of penetration (see illustration)
- Stainless steel loop striker (**G00406**) sold separately
