

## 74405 Threaded Insert Tool

### Hydropneumatic

A high performance hydro-pneumatic power tool designed for installing large diameter threaded inserts and/or inserts requiring more setting stroke. This tool offers a greater amount of power and stroke, whilst maintaining lightweight and ergonomic features as a result of the split intensifier.

#### Features

- Split tool
- Lightweight placing head
- Ideal for placing the Versa-Nut® threaded insert range up to M8
- High placement speed
- Lightweight tool
- Robust tool
- Ergonomic
- Ease of maintenance
